

Facts About Dragonflies

1. Dragonflies have 4 wings, 6 legs, and an antennae.
2. You can find dragonflies by the water.
3. They are expert fliers. They can move up and down, straight, and hover like a helicopter.
4. Dragonflies catch their prey by grabbing it with their feet, while they are flying.
5. The eyes of a dragonfly are HUGE! They have amazing vision and can see every angle, except right behind them.
6. Dragonflies eat 30 to hundreds of mosquitoes every day. They also eat tadpoles, fish, and insects.
7. Some adult dragonflies live for a year, but most live for weeks.
8. Dragonflies have been around for a very long time...even before dinosaurs!
9. They love warm weather, and some dragonflies migrate south in the winter.
10. Dragonflies are harmless to humans.
